## FINISHED PROJECTS

### Office Project – OneAutoMarket

This is an ongoing project in my office. And I am working on it as a team leader since June and it almost in deployment stage. This site is for purchasing, selling, buying and auctioning all kinds of vehicles and spare parts. OneAutoMarket is a digital automotive market place dedicated to being the most transparent brand in the industry. Here is the link for this site: <http://www.oneautomarket.com>.

### Final Year Project – PakiShops - E-commerce Website

Developing an E-commerce Website, it's a kind of lookup website where vendors will be available to have an interface for them individually where they can sell their products and communicate with customers for dealing.

### CPU Utilizer

Developed a system which specifies the current report of RAM, Processors, virtual devices and running speed of other parts through graph.

### Hangman Game

Developed a game which gives the users several chances to guess the word and complete it before the chances finishes. More than 10000 Words are store in a file taken from the dictionary and randomly words appears in screen with few words missing. These missing words are supposed to be guessed by the player.

### SRS – Software Requirement and Specifications

Made for the final year project which comprises of all the functional and non-functional, use cases, all the diagrams and all the other specifications which IEEE standard declared were followed and specified in it.
